### **DETAILED ACTION**

Page 2

### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 7/05/2005 has been entered.

## Allowable Subject Matter

*UD* 1-24 Claim's <del>1≥36</del> are allowed.

The following is an examiner's statement of reasons for allowance: Claim's are allowable because the information in the claims do not read as obvious subject matter on any other prior art. The closest prior art found was by the same assignee, in addition to the prior art submitted by the applicant. The first part of the independent claims is similar to these prior arts until the data loss probability estimation means.

From this point on in the independent claims the method is altered significantly and is not altered in an obvious matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 2613

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim's 25-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The use of "etc." gives the claim infinite possibility in patenting. Therefore, a modification to this language must be used.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim's 37-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyamoto (US 6,574,277).

Miyamoto teaches a code counting means for monitoring the coded data and thereby counting the code volume from the latest synchronization code pattern inserted

Art Unit: 2613

in the coded data to coded data of the target block (Column 5, lines 49-62), a data loss probability estimation means for estimating that data loss will occur to the target block due to transmission error, based on the code volume and a preset error probability per bit (Column 7, line 17 to Column 8, line 50), a degradation estimation calculation means for calculating a degradation estimation as an expected value of image degradation occurring to the target block due to data loss caused by transmission error based on the data loss probability (Column 6, line 35 to Column 7, line 4) and a mode selection means for selecting an encoding mode for the target block by referring to the degradation estimation (Column 6, line 35 to Column 7, line 4).

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick H. Cathey II whose telephone number is (571)272-7326. The examiner can normally be reached on M-F 7:30 to 5:00 (Every other friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571)272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
